GUIDANCE: LOADING ECDS DATA

LEAs are strongly encouraged to begin loading their PEIMS Summer and BOY PK assessment data into the ODS, and preparing the ECDS data by performing the following:

- Run ECDS business validations to start cleaning up Fatal and Special Warnings.

- Run ECDS reports to verify totals and assessment information.

BOY and EOY Prekindergarten assessments:

- Please contact your ECDS Assessment Vendor to determine when your EOY prekindergarten assessment .xml information will be available.

- For technical issues with your Prekindergarten ECDS submission, please submit a TIMS ticket so we can track the issue and escalate if needed.

LEAs can continue to load their pre-K ECDS data into the ODS until **July 18, 2019**.

- 2019 **SUMR1** PEIMS collection will remain open until **June 20, 2019**.

- Any data loaded after **June 20, 2019** will need to be done through 2019 **SUMR2** PEIMS.

- LEAs must **re-prepare their data** in the ECDS application after each upload to the ODS.

ECDS is **extracting the most current PEIMS data** that was loaded into the ODS. LEAs should load all PEIMS SUMR interchanges needed for ECDS reporting.

- **2019 SUMR 2**: If an LEA has **loaded any data into PEIMS Summer Resubmission**, the system will extract and use data for ECDS purposes when the user prepares the data.

  If an LEA <u>does</u> <u>not</u> want to utilize data loaded in their PEIMS Summer Resubmission for ECDS, then the LEA must perform an **ODS delete of 2019 SUMR2** and **re-prepare** their ECDS collection.

For assessment data corrections that **cannot be resolved** with a **ODS reload** and **ECDS prepare,** an LEA would need to run either of the following deletes:

- Delete All ECDS Assessment Data by **Assessment Title** for **School Year** in TSDS Delete all Assessment Data for an LEA

- Delete All ECDS Assessment Data by **Assessment Title** for **School Year** in TSDS for a **specific student**

Private pre-K Deletes

- Private pre-Ks that need a delete of their ODS data, must **submit a TIMS ticket** to process the request.

- TEA will notify the Private pre-K through TIMS upon the successful deletion of their ODS data.

A **lower** assessment score <u>will not </u>replace a **higher** assessment score. If the lower score must be reported, the LEA must perform an **ODS delete,** reload the **lower score** and **re-prepare** the data.

LEAs must **verify** their ECDS assessment scores on the ECD0-000-006 report if they are wanting to replace a higher score with a lower score or -999 (Not Assessed).

FREQUENTLY ASKED QUESTIONS

Is the 2019-2020 ECDS collection a new collection?

No. The 2019-2020 ECDS Collection is not considered a new collection, but rather a change in how TEA collects the current data requirements of ECDS within TSDS.

For the 2019-2020 school year, all ECDS data elements will come from the TSDS collection instead of a combination of PEIMS and TSDS data elements.

Are there any new ECDS Data elements that will be collected for 2019-2020?

No. The ECDS program area has not requested any additional data elements to be collected for the upcoming school year. There will be additional mandatory data elements that are needed to be loaded into the ODS for the TSDS collection, but are not collected for ECDS.

Will the ECDS application screen change for 2019-2020?

Yes. The 'Prepare' button will now be listed as 'Promote' but will perform the same function. Also, there will be some enhancements that will allow individual promotion and validation of ECDS subcategories.

Are there any updates to the Assessment Specifications for 2019-2020?

Yes. The Commissioner approved assessments that dropped off for 2018-2019 school year have been removed from the assessment specifications and are in line with the codes and titles in the DC154 code table in TEDS Section 4.

Will the Student Information System (SIS) vendors need to create a new extractor for the ECDS TSDS collection?

Yes. TEA has updated the TEDS Section 10 data elements for 2019-2020 to provide guidance to vendors in developing their ECDS XML extractor. This would include changes to student/staff demographics, course section, and special programs.

Note: The ECDS assessment vendors will <u>NOT</u> need to modify their assessment XML extractor process for 2019-2020.

Are there any changes to the Private pre-K submission?

No. Submission of Private pre-K data is still optional for 2019-2020 and there are no changes to the data elements collected.

Why has the date to promote Kindergarten ECDS data changed to November for the 2019-2020 school year?

To allow additional time for the Student Information System vendors to develop their ECDS extractor based on the updated TEDS Section 10 data elements for ECDS.

Additionally, the Early Childhood Education division would like to have access to the data closer to the date of when the assessments are administered (mid-September to end-October).

Note: The ECDS Assessment Vendors will NOT need to modify their assessment XML extractor process for 2019-2020

Will an updated knowledge base article and sample .xml file be provided in TIMS for MOU/Partnerships since ECDS is moving back to a TSDS only collection?

TEA will update TSDSKB-568 in TIMS with ECDS program and technical guidance along with any updates needed to InterchangeStaffAssociation.xml file.
