## 2021-2022: CURRENT KNOWN ISSUE (RESOLVED)

The issue with the Texas Workforce Commission taking Master Record ownership of students belonging to another LEA was **resolved at the end of May 2022**. The Texas Workforce Commission was using the incorrect Source System value when resolving their near matches.

If an LEA encounters this issue again, please have them submit a TIMS support ticket for assistance.

**2022-2023**

## 2022-2023: REMINDERS

- The start date for enrollment events for the 2022-2023 school year was **August 1, 2022**.
- The system will be configured to allow up to **300,000 records** per enrollment event batch file.
- After LEAs have processed their cumulative enrollment event batch files, they should only submit their weekly changes.
- ESCs should utilize the TSDS UID Enrollment Submission Summary Report (**UID-000-006**) located in the Global Reports Viewer to monitor the weekly submission of an LEA's enrollment data loads.

## 2022-2023: REMINDERS

There were several occurrences this past school year where the year value in the Date of Birth on the Master Record was the same as the current calendar year. This may result in an incorrect September 1 age and requires TEA outreach to the LEA to verify and correct as needed.

TEA is working with their vendor to update the application and provide a warning message if the year in the Date of Birth matches the current calendar year. The birthyear will be accepted if verified by the user.

Refer to TSDS PEIMS report PDM1-600-002 Statement of Unique ID Student Discrepancies to verify date of birth.

Utilize the PEIMS UID Discrepancy Reports to identify any demographic data in the Unique ID application that does not match your PEIMS data.

## 2022-2023: APPLICATION UPDATES

There are currently **no scheduled updates** to the current version of the **Unique ID system** for the 2022-2023 school year.

TEA is working with their vendor on a major release of the Unique ID system. This version is tentatively expected to be deployed at the start of the 2023-2024 school year. TEA will communicate more information on this next version as it becomes available.
