## **Student Cohort Domain**

The Student Cohort Domain is a general-purpose structure for tracking and reporting on groups of students. A cohort can represent students participating in a program, students whose educational outcomes will be part of an analysis, or simply a list of students fitting particular criteria of interest.

Cohorts may be associated with programs and may have staff associated with the cohort providing services, oversight, or sponsorship.

The Student Cohort Domain contains the following entities:

- **Cohort** is an entity that represents any type of list of designated students for tracking, analysis, or intervention.
- **StaffCohortAssociation** is an entity that indicates the Staff associated with a cohort of students.
- **StudentCohortAssociation** is an entity that represents the Cohort(s) for which a student is designated.

### Entity Description

The Cohort Entity represents any type of list of designated students for tracking, analysis, or intervention.

### General Reporting Requirements

The Cohort Entity reports cohorts that a teacher and student are associated with.

### Special Reporting Requirements

Currently, there are no special reporting requirements.

### Data Element Reporting Requirements

#### **EducationOrganization Reference**

The EducationOrganization Reference represents the identifier assigned to a school.

**CohortIdentifier (E1173)** indicates the name or ID for the cohort.

**CohortDescription (E1174)** is the description of the cohort and its purpose.

**CohortType** is required in the Ed-Fi model and is mandatory for the entity to be loaded into the individual operational data store (IODS). CohortType will not be promoted to the TSDS datamarts.

**Examples**
