Submission Updates

- Resolved with the software release on January 27, 2023:

  - **RF Tracker Application:**

    - The promotion process was using the PEIMS Summer Submission 3 (working collection) data to promote to RF Tracker. The RF Tracker promotion process has been corrected to only promote data from PEIMS Summer Submissions 1 or 2.

Submission Updates

- Resolved with the software release on February 24, 2023:

  - **Report RFT0-100-002 Residential Facilities**

    - There was an issue with the calculation for the average number of students residing at the facility.

    - The promotion process calculates the total number of students residing in a residential facility for a school year. This number is used in calculating the average number of students.

    - A dependency was added to the promotion process for the ResidentialFacility and StudentResidentialFacilityAssociationExtension complex types.
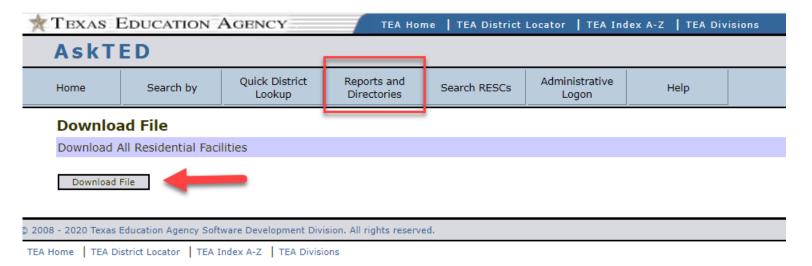

Submission Updates

- **Report RFT0-100-002 Residential Facilities – cont.**

  - Average Number of Students Residing at Facility calculation:

    - The total number of RF students (unduplicated count) for the prior 3 years, divided by 3*.

      * The divisor is equal to the number of years the facility was in use by the LEA.

      - Example: Use 2 for the divisor if the LEA served RF students residing in the facility for 2 years.

  - For 2019-2020 and forward, the data will come from TSDS.

- **Report RFT0-100-004 Individual Student Detail Summary**
  - There is an issue with the student special education information repeating each time a student entered/exited a residential facility.
