TSDS UPGRADE PROJECT KNOWN ISSUES REPORT

February 28, 2024

Contents

NEW ISSUES

COMPONENT	IMPACT	ISSUE	REPORTED DATE	RELEASE DATE
API/MetaEd	Data Reporting	The ReportingPeriodExt (TX) does not allow multiple CalendarDate references to be reported for each ReportingPeriod (E0934). Currently, only one CalendarDate reference can be reported for each ReportingPeriod. TEA will be updating the 2023-2024 data standards to allow multiple CalendarDate references for each instance of the ReportingPeriodExt (TX).	07/17/23	MARCH 2024
ECDS	**ECD0-000-001** Early Childhood Assessment Completion **ECD0-000-002** Early Childhood Assessment Summary	These ECDS Kindergarten reports are not populating any data when run at the ESC level. The reports display 'No Data To Report' despite the necessary data having been promoted to the data mart.	02/22/24	MARCH 2024
PEIMS	Data Promotion	When promoting the Student > Student Basic Information subcategory for PEIMS Fall, the value for the EconomicDisadvantage (E0785) data element is not promoting when the student has multiple instances of the data in the IODS. This is causing rule 40100-000C to fire.	01/26/24	MARCH 2024
PEIMS	Data Promotion	When promoting the Student > Student Basic Information subcategory for PEIMS Fall, the value for the ParentalPermission (E0896) data element is not promoting. This is causing rules 40100-0142 and 40110-0012 to fire.	01/25/24	MARCH 2024
PEIMS	Data Promotion	When promoting Staff > Responsibility data for PEIMS Fall, an ORA unique constraint error is triggered where StaffSectionAssociation data references a SectionIdentifier (E1056) that has multiple CourseSequence (E0948) codes. TEA will be updating the Staff > Responsibility promotion logic to promote the appropriate Course data to avoid the ORA unique constraint promotion error.	12/01/23	MARCH 2024
PEIMS	40100-0095	Rule 40100-0095 is firing when data element UnaccompaniedYouth (E1084) is not reported for a Prior Year Leaver who is reported with a value for the HomelessStatus (E1082) data element. Prior Year Leavers do not report any data regarding UnaccompaniedYouth status. LEAs can disregard this validation in the parallel PEIMS Fall and Summer Submissions. TEA will be updating the rule for 2024-2025 to no longer apply to Prior Year Leavers.	01/31/24	2024-2025 SCHOOL YEAR

PEIMS	41461-0013	Rule 41461-0013 is firing for Prior Year Leavers because those students will not be reported with a value of 'B', 'D', 'F', or 'X' for the AsOfStatusLastFridayOctober (E3007) data element. LEAs can disregard this validation error in the parallel PEIMS Fall submission. TEA will be removing this validation rule for 2024-2025 school year.	01/25/24	2024-2025 SCHOOL YEAR
SPPI-14	**SPP0-000-002** TSDS SPPI-14 Expected Student Counts Report	The SPP0-000-002 report is running longer than expected. Please note that the report will process but it may take a few hours to complete. TEA will be improving the performance of this report for the 2024-2025 school year. Reminder: This report is only available at the ESC-level. The student counts on the report should match the number of students that promote to the SPPI-14 data mart. LEAs are encouraged to promote their SPPI-14 data to ensure accurate submission data in the parallel environment.	02/09/24	2024-2025 SCHOOL YEAR
DMC	Level 2 Validations - Charter School Waitlist	LEAs running Level 2 Validations for the Charter School Waitlist submission are receiving a 'Failed - System Error' validation request status for the Campus, Enrollment (School Association), and Student Basic Information subcategories. Workaround: This issue is unique to Level 2 Validations. LEAs should proceed with their Charter School Waitlist parallel testing in the downstream Core application until TEA is able to resolve the issue.	02/06/24	TBD

MARCH 2024 RELEASE

COMPONENT	IMPACT	ISSUE	REPORTED DATE
Child Find, PEIMS	Data Promotion	CalendarCode (E0975) values longer than 2 characters cause errors when the data is promoted to the Core or PEIMS data marts. TEA is currently analyzing the possibility of updating the Core and PEIMS data marts to allow the CalendarCode data element to be up to 60 characters, which would match the Ed-Fi standard.	07/31/23
Class Roster	Data Promotion	If data is not being sent to the IODS for an instructional staff member that has a StaffClassificaton (E0721) of 087 and/or 047 in the StaffEducationOrganizationAssignmentAssociation entity, the Staff Teacher Class Assignment subcategory will not promote any records when the data is promoted to the Core data mart. Note: This issue will be addressed for the Class Roster Winter Submission. It will not be fixed for Class Roster Fall.	11/02/23
Claim Sets	Local Descriptor Reporting	The TEA-defined Claim Sets do not allow vendors to create and send local descriptor values. By default, vendors are only able to send TEA or Ed-Fi namespace values. TEA will be updating their Claim Sets to allow vendors to create and send local values. Workaround: A user-defined Claim Set can be created in the interim to allow for local values to be created and supplied by the vendor. Users can clone the existing TEA-defined Claim Sets and modify the create, read, update, and delete permissions on the descriptor resources.	11/28/23
DMC	Level 1.5 Filters	Leading zeros in LEA IDs are not being displayed in the Level 1.5 filter results.	12/28/23
RF Tracker	Data Promotion	If the FirstName (E0703), MiddleName (E0704), or LastSurname (E0705) value for a staff or student exceeds 60 characters, it will cause errors when the data is promoted to the Core data mart. TEA will be updating the Core data mart to allow the FirstName, MiddleName, and LastSurname records to be up to 75 characters, which would match the Ed-Fi standard. Note: This issue has been resolved for the Class Roster and CSW data collections only.	07/31/23

PEIMS	30090-0060 30090-0061 30090-0062 30090-0105 30060-0106 30090-0125	The PEIMS Fall Submission validation error data is displaying the CourseCode (E3071) instead of the StaffService (E3072) value for these validation rules.	01/18/24
PEIMS	Data Promotion	If a student is reported in the PriorYearLeaver entity with an AsOfStatusLastFridayOctober (E3007) equal to 'A' and is also reported in the Student entity with an AsOfStatusLastFridayOctober not equal to 'A', the PEIMS application causes an ORA unique constraint (duplicate) error when promoting data. TEA is evaluating the PEIMS Fall data promotion logic to determine what changes will need to be made to ensure the correct data is promoted.	12/19/23
PEIMS	Data Promotion	For PEIMS Fall StaffResponsibility, the actual ClassroomPosition (E1454) value is being promoted instead of the translated value needed for PEIMS Fall reporting . For example, the promotion logic states to promote a value of '087' when descriptor code '01' is reported for ClassroomPosition. Rather than '087', the system is promoting '01' to the PEIMS data mart. See the PEIMS Fall promotion logic guide for additional details.	01/19/24
PEIMS	Data Promotion	When an instructional staff member is reported with a CourseCode (E3071) containing multiple CourseSequence (E0948) values, the Staff > Responsibility subcategory fails data promotion due to an ORA unique constraint error. TEA is evaluating the PEIMS Fall data promotion logic to determine what changes will need to be made to promote just one Staff > Responsibility record in this scenario.	12/01/23

APRIL 2024 RELEASE

COMPONENT	IMPACT	ISSUE	REPORTED DATE
DMC	Level 1.5 Filters	'Descriptor Value' filter results are being triggered for Landing Zone only data elements, such as Term and Achievement Category. These data elements do not have any TSDS reportable values and cannot be corrected with descriptor mapping. LEAs should ignore these Level 1.5 filter results until a software release resolves the issue. The data is flowing to TSDS correctly despite what the message on the filter result states. Workaround: LEAs can use the 'Verified' flag to hide these filter results.	02/01/24

2024-2025 SCHOOL YEAR RELEASE

COMPONENT	IMPACT	ISSUE	REPORTED DATE
API/MetaEd	Data Reporting Guidance	The data element ProgramType (E1337) must be reported when reporting students with a ParentalPermission (E0896), including the descriptor value 'C' (Parent or Guardian Denied Placement of an EB/EL in any Special Lang Program). Currently, the ProgramType descriptor table does not contain a program for parent denial. TEA will evaluate the table for possible changes to the 2024-2025 TEDS to resolve the issue. Workaround: TEA does not promote the value for ProgramType to any PEIMS or Core submission so LEAs may report any value for students being reported with a ParentalPermission of 'C'.	11/09/23
API/MetaEd	Data Reporting	The InstructionalSettingSets common type does not allow for multiple instructional settings to be reported with the same InstructionalSettingBeginDate (E3025). When data is reported with the same InstructionalSettingBeginDate, a Level 1 error is triggered. TEA is evaluating the data standards to determine what changes will need to be made to allow for multiple instructional settings to be reported with the same begin date. Workaround: The LEA should load only one InstructionalSettingSet. A student who receives speech therapy services and who also receives instructional services through another InstructionalSetting (E0173) should be reported with the primary setting (not with 00) and a SpecialEducationProgramService (E3058) 25 (Student Receives Speech Therapy Along With Service Through Another Special Education Instructional Setting).	11/10/23

API/MetaEd	Data Reporting	The StaffServiceSets common type does not allow for multiple staff services to be reported with the same StaffService (E3072) descriptor value and StaffServiceBeginDate (E3060). When data is reported with the same StaffService and StaffServiceBeginDate, a Level 1 error is triggered. This may impact special education aides who provide the same service for multiple grade levels. TEA is evaluating the data standards to determine what changes will need to be made to allow for multiple staff service sets to be reported with the same StaffService and StaffServiceBeginDate values. Workaround: For the parallel year, LEAs should either only provide one StaffServiceSet for the instructional aide or provide a different StaffServiceBeginDate for the same StaffService to avoid errors.	11/17/23
PEIMS	40100-0156	In the Upgrade TEDS 2024.2.1 publication, descriptor value '0' was removed from the C122 TitleIPartAParticipant descriptor table. As such, TEA is no longer expecting StudentTitleIPartAProgramAssociation for every enrolled student. However, TEA did not remove fatal validation rule 40100-0156, which requires StudentTitleIPartAProgramAssociation data for all students with an AsOfStatusLastFridayOctober (E3007) equal to 'B', 'D', 'F', or 'X', from the TSDS Upgrade PEIMS environment. TEA has downgraded this rule in the PEIMS parallel environment from a fatal to a special warning. LEAs can ignore this validation in the parallel PEIMS Fall submission. TEA will be updating the 2025 data standards to remove this validation rule.	01/09/24
PEIMS	Data Promotion	If a student has multiple Language (E3033) values for either the 'Home Language' or 'Student Language' Language Use (E3035) in their IODS, the system will only promote one Language value each Language Use. After promoting data to PEIMS, LEAs should utilize the Data Search functionality to verify the correct home language and student language values promoted for their students. TEA is evaluating the issue to determine what changes will need to be made to ensure the correct language values are promoted for the home language and student language.	12/28/23

PEIMS	Data Promotion	When a student is reported in the PriorYearLeaver entity with an ExitWithdrawType (E1001) not equal to '01' (Graduate), and IndividualGraduationCommitteeGraduateIndicator (E1562) is not equal to 'true' the data element is promoted to PEIMS with a value of '00'. The result is causing rule 40203-0005 to fire. TEA will update the PEIMS promotion logic to not promote a value when IndividualGraduationCommitteeGraduateIndicator is not equal to 'true'.	01/24/24
PEIMS	Data Promotion	When a student is reported in the PriorYearLeaver entity with an ExitWithdrawType (E1001) not equal to '01' (Graduate) and FHSPDistingLevelGraduate (E1542) is not equal to 'true' the data element is promoted to PEIMS with a value of '0'. The result is causing rule 40203-0012 to fire. TEA will update the PEIMS promotion logic to not promote a value when FHSPDistingLevelGraduate is not 'true'.	01/24/24
IODS	Pre-Populated Data	Administrative campuses are not included in the campus data that TEA is pre-populating in each LEA's IODS. This can cause errors when reporting non-instructional staff at an administrative campus. TEA is continuing to evaluate this issue to determine the long-term solution. Workaround: Vendors are able to publish these additional campus records to the Schools resource. A GradeLevel (E0017) must be supplied when reporting a campus. Any value can be reported for an administrative campus since the GradeLevel is not promoted to the PEIMS and Core data marts for these campuses.	10/13/23

RELEASE TBD

COMPONENT	IMPACT	ISSUE	REPORTED DATE
DMC	L1.5 Filters - Unique ID Staff/Student	If the FirstName (E0703), MiddleName (E0704), or LastSurname (E0705) value for a staff or student exceeds 60 characters, it may cause an invalid L1.5 Filter. TEA will be updating the eScholar Unique ID application to allow the FirstName, MiddleName, and LastSurname data elements to be up to 75 characters, which will match the Ed-Fi standard.	07/31/23
API/MetaEd	Data Reporting	The CourseTranscript common type does not allow for multiple course transcripts to be reported with the same CourseCode (E3071) with different course sequence codes for a student. When data is loaded with the same CourseCode, a Level 1 error is triggered. TEA is evaluating the data standards to determine what changes will need to be made to allow for multiple course transcripts to be loaded with the same CourseCode for a student.	01/26/23
Class Roster	**CLS1-100-006** Fall Submission Summary Report **CLS2-100-003** Winter Staff Class Assignment Report **CLS2-100-006** Winter Submission Summary Report	When these reports are run for the first time a status of 'undefined' is displayed. Once the refresh button is clicked, the status appropriately displays 'in progress'. This issue does not impact the generation of the report. Workaround: LEAs can click the 'refresh' button to display the correct status.	05/26/23
